ABOUT

Self-taught MERN stack developer passionate about building web applications. Proven track record of launching successful projects independently. Seeking challenging opportunities to contribute and expand skills as a full-stack developer. Committed to delivering exceptional user experiences and staying at the forefront of emerging technologies.

SKILLS

Proficient With :Node Js, React Js, MongoDB, Express, Material UI

Familiar With : Redux,EC2,S3,Git,Mongoose,Docker,JWT,Nginx,Socket.IO, GitHub

WORK EXPERIENCE

FRONTEND DEVELOPER

Vumonic Datalabs

Bangalore,India

Successfully developed and implemented responsive front-end solutions using React.js and Next.js, ensuring optimal user experiences. Employing Firebase authentication, I enhanced security measures, while seamlessly integrating MongoDB for robust back-end functionality, showcasing my proficiency in full-stack development.

PROJECTS

SOCIALSPHERE - Social Media - [Live Link](#)

[Github](#)

A social media website enabling users to connect through follows and engage with posts, facilitating meaningful interactions and connections.

- Provided a secure registration process and login functionality for users to create and access their accounts.
- Allowed users to create and upload text, image, fostering content sharing.
- Implemented a system for users to follow others and build connections within the platform.
- Enabled users to edit and update their profile information, including profile pictures and bio.
- Allowed users to log out securely to protect their accounts.

Technologies Used : **React.js, Redux, MongoDB, Mongoose, Express.js, Node.js, Material UI, JWT**

ST PIZZA - E-Commerce - [Live Link](#)

[Github](#)

A fully functional E-commerce platform for seamless ordering and customization of pizza.

- Developed using Next.js for frontend and backend functionality, incorporating MongoDB for backend data storage.
- Styled with Tailwind CSS, the platform offers a user-friendly homepage with sections for best sellers, about us, and contact information.
- Users can seamlessly browse the menu, add items to the cart, and customize orders with various sizes and extras.
- Integration with Stripe enables a smooth and secure checkout process, supporting credit or debit card payments.
- NextAuth facilitates user authentication via email/password or Google account, empowering users to manage profiles and addresses for faster checkout.
- Admins have access to manage categories, menu items, user accounts, and orders, while AWS ensures reliable file storage for enhanced performance and scalability.

Technologies Used : **React.js, Next.js, Tailwind Css, MongoDB, NextAuth, AWS, Stripe**

MINI PROJECTS

NETFLIX CLONE - [Live Link](#)

[Github](#)

- Integrated with the TMDb (The Movie Database) API to fetch movie and TV show data, including titles, images, ratings, and descriptions.
- Implemented search functionality to allow users to search for specific movies or TV shows.

TO-DO APP - [Live Link](#)

[Github](#)

- Developed a user-friendly interface for adding, editing, and removing tasks. Each task should have a title, description, and status completed or not.
- Implemented local storage to store and retrieve task data. This enables tasks to be saved on the user's device, providing a seamless experience even if the user refreshes or closes the browser.
